Full thing the minimum in solog sile form, fire
Fig. 11 silence give constitution. The
Charebes as a rule are for the constitution. The

by the constitutional connention that met at the minimum for the following resons: Fire—It provides for mo collects than the pub-lic service requires and it also makes provision for the creation of offices by the courts and leg s-iature that are tuculled for and unnecessary. Second—The saisries are fixed too high, with no provision for a reduction of the saire but in nearly every instance it provides for an inprovision for a reduction of the sarve but in meanly every instance it provides for an increase.

Third—This being the case, the result will be an office seeking tiass—the most worthless class that can exist. It will also foster machine poil tick of the most corrupt and offices the character.

Fourth—It is calculated to encourage extrata game in the expenses of the legislative assembly and also in all is appropriations, and thus to grievously burden an overlaxed people.

Fifth—It provides for secret sessions of the legislature to which we are strongly opposed.

Str!—It invites foreign easitial to come here and obtain possession of our land and to buy up our industries, and operate the same and thus in time reducing our fair young state to the same condition that Ireland occupies to-day. We believe that our land, our industries and our mines should be hold sacred to American capital and to American landsstry.

Setenth—It provides distinct it shall take a two thirds vote of both houses of the legislature to submit an amendment to the constitution to a vote of the peuple, thus practically prohibiting any amendment function.

Fighth—For these, and many other reasons, we call upon farmers inboring men and all tax payers to unite with us in voting down an Instrument from the result of the public welfare.

As to these coachers upon the perserves of benevolence the eshameless parantes, who se /* ho d apon generous sympathy and fatten upor its substance there are no words that will sufficiently reprodute them or execute the crime of which they are accuse. The com-mon thief, who steads from the hoardings of plenty would scorn the comradeship of the cur, who while playing the role of a di pen per of the bounty of generosity enriches him self from the funds to which has, by this means found access. It is to be regretter that there is not a special penalty provided for a deed so shaneless as this since as the term, "their" does not sufficiently expres-jus enormity, the penalty provided for the common this is inadequate to the number ment of such acouncreism. It is to be hoped that bonest indignation will not sleep until the facts in this case are fully brought out and that justice as far as ord mary penalty is able to compare it will be ied to these men who, for want of a more opprobrious term can only be called theever.

CHRISTIAN MISSIONS.

THE OREGONIAN last month republished the statement of Lieutenant Wood of the United States navy, to the effect that Christian missions in China were a fai ure. The views of Lieutenant Wood were in accord with the experience of a distinguished Eng hishman, for many years a high government official in India who published in a leading English magazine the result of his observa tions of missionary work in Irdi. reusm of the value of the present talssionary work and methods was seized upon by the Rev Dr Koughton in his recent missionary sermon as proper provocation for the delivery of a sereed of abuse of what he was pleased to term the typical Carconian But the world,moved before Galdeo found it out, and it continued to move after the threats or the priests of Rome lorded him to recant, and the world continues to move | all have given tree comage of got i her the sto-day withough Rev Dr Houghton does mot appear to know it. The moral and mtallectual world has moved forward so far that something more is necessary to montrot a new-paper of ignorance or irreligion than the Juipit furnitions just an cherical egotist. In a recent mumber of the Christian Fegister Mr Kentaro Kaneko of the privy council of Ja pan makes statements concerning the inis-sionary work in that country, which go far to confirm the criticism of the present method of working foreign missions that has been republished by The Ongacous. The Mr Kaneko testifica mind the best-educa ed classes in Japan ' Mr. Kaneko points out that the missionary method is deficient in its treatment of the

TAKING ALL HE CAN GET The proposition of the tory secretary, Bal-Mour, for the endowment by the government For a Catholic university at Bublin, was promptly accepted by Paruell, and the Irish members of the home rule party are com mitted to its support. Paruell has acted in perfect consistency with his policy as agitator, which has always been to accept any conversion from England to Ireland from comise good. He abites nothing of his demand for home rule, but has always declared that he was ready to leave one party for the other for the sake of Ireland. Glad For the other for the sake of Ireland. Glad Selone does not support the scheme, neither do the Engish and f . A bhernis, who have that there supported Pernell and home rule Farnell could not reluse this concession from the tory party, because a Calobote university is popular with the clargy and the mass of the people and not to have accepted the wonds have been float to Parnell is political influence. Parnell is a power and people of Ireland behind him, and only by maintaining the solidarity of his influence and leadership of the Irish home rule party at home can behope for the factors to make the rival political parties in factors to make the rival political parties.

Inture to make the rival political parties in England bid against each other for the Irish

land.

If Balfour's proposition for an Irish Catholic university byer comes up for debate and action we shall see some queer results. The Uniter Protestant tories, the Neaponier-

was silver and the English pound was at ver but in 1816 I ng and changed the coinuge act, made gold the unit of value and allowed it free coinage, but allowed no legal tender to silver in a greater sum than forty shillings. Up to about 1873 every important government in Christendom wave Ingland allowed tree comage in a lver but since that date not one of them has permitted free coinage of silver, act or cougress of February 1878 a limited collunge of silver off government account only was ordered and under this act which per muits a minimum comage of \$2600 000 a month and a max mum compre of \$1,000,000 a month at the di cretion of the secretary of the Treasury there had been comed up to the 30th of last November 31° 500 000 silver dollars of which all but \$14 181 CSI were reported in actual circulation viz

States 12 to 16 England's carly action in giving free coinage to gold and not to adver was due to the fact that there are no sireer mines of importance in the British empire but gold mines of vast Suportance and the example of England will probably be quoted by Senator Sewart as a reason thy the by Senator Sewart as a reason thy the United States, the greatest producer of silver in the world should protect its silver by giving it free coinage, as England does her gold. Our present law for a limited compulsory silver coinage passed in 1883, was passed through the influence of Senator Alishop, of lows and the silver" republican senators from Colorado and the Pacific states The bid was powerfully than moned by Senator Thurman so that republicans exceeded the usummn amount standing of the present silver situation and the prospective attempt to tract 'free silver Senator Stwart argies that the demonetization of silver by the United States

The arguments My Market 1997 dounts how solved in the treasure in the regular resented by silver cortificates. The argument of Mr Stewart is likely to find favor with the Western republicans, and with some qualifications it will be accepted by those Eastern republicars who accept the views of Mr Edwards Pierrepont Mr Pierrepont differs from Mr btewart in one important respect. While he would gradually pay off the interest bearing boulds and the greenback's repeat the compulsory coin age act of 1878 and allow free silver coinage. he would restrict the co nage of silver to our own product until other commercial na tions join 69 in a treaty This is a very important qualification of Mr Stewart s

LANY OF WIR House — Do you still like our Charter Dak Store as well as when we first got it, Mary?

Serwant—Oh, every bit as well, Marm.
Lany of the House—I am expecting a friend to take dimer with us next week, on purpose to show her have nice our store cooks everything, and I want you to have a nice dimner for us.

Servant—indeed I will, Marm. There sho trouble took also with that store. The Wise Gausse Overs Boors makes it so much savier than other three sines been used to, and I have so much more time to make everything just right—Just look at that roll! I never have bad luck with bread, biscuitsior cake, now, Lany of the House—Why, how do you explain it?

Servant—well, I don't have to watch everything so close for fear it will burn. You know now careful you have to be with a laked enstand, it is so apt to burn on top before it is baked through. The Charter tisk bakes it perfectly without any danger of burning. And then in roasting a turkey, I don't have to keep hariting it every doe minutes. It reasts beautifully brown without it, and without drying it up like the tight ovens do. And you know how crisp the blesuits are without being hard and touch. You siways presised my biscuits, if it wasn't for the wire gause oven door I know they wouldn't be near as nice. I hope I'll never have I cook anywhere neath where they haven't got a Charter Oak Stove organge.

ABSOLUTELY PURE.

For quick raising, the Royal Baking Powder is superior to all other leavening agents It is absointely pure and wholesome and of the highest leavening power. is always uniform in strength and quality and never falls to make light, sweet, most paiatable and nutritive food. Bread, biscuts, muffins, care, etc., raised with Royal Baking Powder may be easen hot without distressing results to the most delicate digestive organs. It will keep in any climate without deterioration.

Prof H. A. Mott, U. S. Government Chemist, after examining officially the ornacipal baking powders of the country, reported .

"The Royal Baking Powder is absolutely pure, for I have so found it in many tests made both for that company and the United States Government.

"Because of the facilities that company have for obtaining perfectly pure cream of tartar, and for other reasons dependent upon the proper proportions of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable baking powder offered to the public.
